

# MARBLE EFFECT

## HIGH-COVERING SPRAY PAINT FOR A DECEIVINGLY REALISTIC MARBLE EFFECT

High-covering spray paint for a deceptively realistic marble effect. Can be used on many different surfaces such as paper, cardboard, primed canvas, wood, glass, metal, ceramics, porcelain, stone, acrylic and other paintable materials. The marble effect is formed by very fine colored paint strands on the surface area of the object in question. The area which is to be sprayed is not entirely covered and will stay partially visible. Can be top-coated with many common lacquer types once thoroughly dry. MARBLE Effect can be combined with Montana GOLD, Montana ACRYLIC markers and customary acrylic paints. The Marble Effect can come standard with a calligraphy that can be adjusted to create spray output lines in vertical, horizontal or variations thereof.
