

PLASTIC PRIMER

FOR PLASTIC SURFACES

Montana Plastic Primer is the perfect pre-treatment for plastic surfaces. After priming and drying, plastic surfaces can be painted with Montana sprays that have a synthetic, acrylic, or nitro-combination base. Can be used with the following types of plastic:

Polypropylene Rubber, Modified (EPDM),
Acrylic Butadiene Styrene Plastics (ABS), Glass-Fibre Reinforced
Plastics (GfK), Hard Polyvinyl Chloride (Hard-Pvc),
Polyurethane (PUR), Polystyrene (PS), Polyamide (PA)

It is recommended to test before use. Drying time varies depending on temperature and humidity and may take a few hours. Available as 400ml.

For enhanced longevity it is recommended so prime plastic surfaces with Montana PLASTIC PRIMER prior to application of further coats of spray paint
